REF. 451 011 - 07/01/09

AGLE/ANODE - F - NICE

✓ What is REVACIL ?

REVACIL is a highly effective biguanide based swimming pool sanitizer and algistat with **NO CHLORINE**. REVACIL is very stable; it is not affected by heat, sunlight or changes in pH. REVACIL can easily replace chlorine in all types of pools.

✓ REVACIL is registered by the US Environmental Protection Agency (EPA)

This biguanide based product has been fully tested all over the world. Pool owners have been using and enjoying REVACIL worldwide for over 20 years! REVACIL is EPA registered and has been formulated to suit any swimming pool surface and filtration system.

✓ REVACIL: a chlorine-free product

- Totally chlorine-free product.
- A clearer pool for a longer period of time.
- REVACIL is not absorbed by UV rays; therefore saving you money.

An EASY program to keep your Swimming Pool happy: REVACIL

The REVACIL 3-step pool care system is simple:

1. Every Saturday, test your REVACIL level with REVACIL TEST STRIPS. Adjust the REVACIL level up to 50ppm. (Please refer to the chart below).
2. Every Saturday, add 8 oz. of REVABLUE algaecide per 10,000 gallons.
3. Every 3-4 weeks, add 1 gallon of REVATOP 36 per 10,000 gallons. REVATOP 36 is the most concentrated swimming pool clarifier available; 34.5% hydrogen peroxide.

For a sparkling pool year after year:

ALTERNATE REVACIL AND CHLORINE!

The biocide switch rule is the most efficient and protective method of treating your pool year after year. Alternating the use of REVACIL and chlorine in your pool will help prevent the growth of stubborn algae. Some types of algae can be very resilient when only treated by REVACIL. Switching REVACIL and chlorine can also clean the bio film from the inside of the pool pipes. This will help to extend the life of your pool, as well as, help to ensure clean sparkling water season after season.

For detailed instructions, and further explanations of all the benefits of the biocide switch rule, please refer to the Happy Pool Care Guide available online at www.mareva.fr

Become a happy REVACIL user and forget the annoying effects of Chlorine!

Say Goodbye to nasty chlorine odor, red eyes and itchy skin. Enjoy your swimming pool with your family and friends.

REVACIL is one of the most simple and user-friendly water treatment program available today.

With REVACIL you will spend more time treating yourself in your pool than treating your pool !

The next generation of chlorine-free pool sanitizing

	5,000 gallons	7,500 gallons	10,000 gallons	12,500 gallons	15,000 gallons	17,500 gallons	20,000 gallons
If 30 ppm	13 oz.	19 oz.	26 oz.	32 oz.	38 oz.	45 oz.	51 oz.
If 15 ppm	22 oz.	34 oz.	45 oz.	56 oz.	67 oz.	78 oz.	90 oz.
If 0 ppm	32 oz.	48 oz.	64 oz.	80 oz.	96 oz.	112 oz.	128 oz.

To use the above chart, find your corresponding pool size in gallons and then determine the current REVACIL level of your pool. Your Revacil level can be tested with REVACIL TEST STRIPS or by an Authorized REVACIL Dealer. Please add the recommended ounces of REVACIL Sanitizer to your pool to maintain a 50ppm level. At 50ppm, REVACIL is most effective to keep your swimming pool clean and clear.
