

## **REVA - KLOR STAB**

### **Special stabiliser for chlorine**

- With the **TOP 3 / REVA-KLOR** treatment method, it is recommended to use **REVA-KLOR STAB** (and only in those 2 cases) :
  - ✓ At pool filling if it is done during summer,
  - ✓ At pool emptying after each season.
- If you use non-stabilised chlorine (calcium hypochlorite, sodium hypochlorite), **REVA-KLOR STAB** reduces chlorine consumption. (thanks to its stabilising effect).

#### **Packaging description :**
