

REVA – OUT (liquid) **Inhibiting and sequestering agent**

Use :

- Thanks to its double action, **REVA-OUT** sequesters (in order) the metallic ions, the calcium and the magnesium dissolved in the water. It prevents calcium deposits in hard and heated waters.
- Suitable for all types of linings and all types of treatments.

Packaging description :

| | 5 L |
|------------------------------|----------------------------|
| Bottle: Colour | White |
| Height | 290mm |
| Label | 160x125 R/V |

| Childproof | No |
| Box: Kraft + label | Yes |
| Printed | No |
| Of | 4 bottles |
| Delivered on Euro pallets of | 32 boxes x 4 = 128 bottles |

Using method:

Preferably, treat your pool from the beginning to obtain a better efficiency of the sanitising products.

- Calculate your pool TH (hardness) with the **CALCAIRE-TEST**
- Necessary quantity at the beginning of the season:
 - 0,25 L per 10 m³ up to 350 mg/L
 - 0,40 L per 10 m³ for a TH from 350 to 400 mg/L
 - 0,50 L per 10 m³ for a TH from 400 to 500 mg/L
 - For TH over 350 mg/L, seek your professional retailer's advice to do a treatment with **CALC-OUT**.
- Pour the product in front of the outlets, while the filtration is running.
- Add **REVA-OUT** according to water additions during the season.

Safety

REVA-OUT may cause serious eye lesions.

- ◆ Use eye/face protection device.
- ◆ In case of contact or splashes in the eyes, wash immediately with plenty of water. Seek medical advice.
- ◆ Avoid contact with skin. Wash hands carefully after handling.
- ◆ Keep out of children.
- ◆ If swallowed, seek medical advice immediately and show the container or label.
- ◆ In order to avoid any accidental swallowing, do not eat, smoke or drink during use.
- ◆ Do not mix with other chemicals.

Storage:

- Close container well after use.
- Store in a cool dry place.
- After 18 to 24 months storage, or at low temperature ($T < 15^{\circ}\text{C}$), the product may have a white deposit. This will not alter its efficiency. In that case, shake the bottle before adding the necessary quantity of product in the pool, and rinse the bottle.

Composition :

This product contains a calcium precipitation inhibitor and a sequestering agent.

Shelf-life : 3 years
