

REVA-PLUS powder

To increase your pool pH

- **REVA-PLUS** is compatible with all types of treatments.
- **REVA-PLUS** increases and stabilises your pool pH.

Packaging description :

	1 kg mini bag	5 kg pail	10 kg pail
Mini bag/pail: Colour	4-colour printing	White	White
Height	230mm	200mm	270mm
Label	No	125x265	125x265
Tactile symbol	No	yes	yes
Homologation	No	yes	yes
Lid : Colour	No lid	Red	Red
Childproof	No	No	No
Box: Kraft + label	Yes	No	No
Printed	No		
Of	12		
Delivered on Euro pallets of	504	84	52

Using method :

- Measure your pool pH (examples: **pH/chlorine** or **pH/REVACIL test kit**).
- Add the necessary quantity of **REVA PLUS** (cf. doses below) in several times (use the dosing jar). Pour **REVA-PLUS** along pool walls while taking care to disperse it as much as possible (with the filtration system running).
- If *pH is between 6,8 and 7,4* :

Calculation of the necessary quantity of REVA PLUS powder : $m = 100 \times V \times \Delta \text{pH}$

m = quantity of **REVA PLUS powder** to put (in g)

V = pool volume (in m³)

ΔpH = pH wanted - pH measured

example : 60 m³ pool with pH 6,8 (too acid water, corrosive for metallic pieces). pH wanted = 7,4

$$v = 100 \times 60 \times (7,4 - 6,8) = 3600 \text{ g (=3.6 kg)}$$

Warning : if the quantity of **REVA-PLUS** to be added is higher than 1kg, it is recommended to add only **ONE kilo a day and per 100 m³** or every two hours while leaving the pump to run permanently.

- When *pH is lower than 6.8*, then not directly measurable on the test kit, add 1 Kg of **REVA-PLUS** until pH goes up above 6,8. Then use the above formula.
- Check pH after.

Safety :

REVA-PLUS powder is irritant to eyes.

- ◆ In case of eye contact, wash immediately with plenty of water. Seek medical advice.
- ◆ Keep out of reach of children.
- ◆ Do not breathe fumes.
- ◆ Avoid skin contact. Wash hands properly after handling.
- ◆ To avoid any accidental swallowing, do not eat, smoke or drink during use.
- ◆ Do not mix with other chemicals.
- ◆ If swallowed, seek medical advice immediately and show the container or label.

Preservation :

- Keep in a cool dry place.
- Close container well after use to prevent product from solidifying.

Composition : sodium carbonate

1 kg mini bag – 5 kg and 10 kg pails
