

## Stop-algues moutarde

### Special algaecide for mustard algae

#### Use :

- Mustard algae are mainly brought by the rains coming from the Sahara. The germs stick to dusts, are carried by the wind and rain and, once in the water, they develop. The swimming pools can be polluted in particular areas and it is rare to see an isolated case.
- These algae are under the form of very volatile yellow dusts (yellow cloud when you vacuum) which deposit on pool bottom and walls..
- **STOP-ALGUES moutarde** is especially made to treat and destroy these algae.
- It is compatible with all types of treatments. It must be used together with oxidising products (in shock treatment) :
  - **REVATOP+** in any treatment and obligatorily with the **REVACIL** treatment.
  - Quick chlorine or shock chlorine in any treatment, except with the **REVACIL** treatment.
  - **REVA CHOC** or active oxygen.

#### Packaging description :

		<b>1 kg</b>
Jar :	Colour	White
	Height	197mm
	Label	130x233
	Tactile symbol	yes
	Homologation	yes
Lid:	Colour	White
	Childproof	Yes
Carton :	Kraft + étiquette	Yes
	Printed	No
	Of	12 jars
Delivered on Euro pallets of		36 boxes x 12 = 432 jars

#### Using method :

- A. Brush the areas infected by the mustard algae in order to put them in suspension.
- B. Disperse **STOP-ALGUES moutarde** into the pool.
- C. Add the oxidising product.

*Wait for a few hours before bathing.*

#### Using doses :

##### 1) With REVATOP+ :

- *Curative treatment* per 100 m<sup>3</sup> : 0,5 Kg **STOP-ALGUES moutarde** + 10 L **REVATOP**
- *Preventive treatment* to be done at the beginning and in the middle of the season per 100m<sup>3</sup> : 300 g **STOP-ALGUES moutarde** + 5 L **REVATOP**

##### 2) With REVA-KLOR Shock or quick :

- *Curative treatment* per 100 m<sup>3</sup> : 0,5 Kg **STOP-ALGUES moutarde** + shock chlorination, that is 2 Kg of **REVA-KLOR Choc 50** or of **REVA-KLOR rapide 60**
- *Preventive treatment* to be done at the beginning and in the middle of the season per 100m<sup>3</sup> : 300 g **STOP-ALGUES moutarde** + shock chlorination, that is 2 Kg of **REVA-KLOR Choc 50** or of **REVA-KLOR rapide 60**

**3) With REVA-CHOC active oxygen:**

- *Curative treatment* per 100 m<sup>3</sup> : 0,5 Kg **STOP-ALGUES moutarde** + 5 Kg de **REVA-CHOC active oxygen**
- *Preventive treatment* to be done at the beginning or in the middle of the season per 100m<sup>3</sup> : 300 g **STOP-ALGUES moutarde** + 5 Kg **REVA-Choc active oxygen**

**Safety :**

**STOP-ALGUES moutarde** does not induce any particular hazard. But as a precaution, we recommend to :

- ◆ Keep out of children
- ◆ Avoid contact with skin and eyes. Wash hands carefully after handling.
- ◆ To avoid any accidental swallowing, do not eat, smoke or drink during use.
- ◆ Do not mix with other chemicals.
- ◆ Rinse the empty pail into the pool before disposal

**Storage :**

- Keep in a cool dry place.
- Close container well after use.

*Shelf-life : 3 years*
