

STOP ALGUES

- Double action shock oxidizer (solid) -

- **STOP ALGUES Double action Shock oxidiser** is a non oxidising product *for storage and transport*.
- It is under the form of multifunction granules which allow to:
 - Do shock chlorination in case of algae growth.
 - Regenerate the chloramines of the pool into active chlorine.
- **STOP ALGUES Double action shock oxidiser** is particularly suitable for pools treated with chlorine-based products (organic chlorine, salt electrolysis, bromine...).

Packaging description :

	5kg pail
Pail : Colour	White
Height	200mm
Label	125 x 265
Tactile symbol	yes
Homologation	yes
Lid : Colour	White
Childproof	No
Box : Kraft + label	Yes
Printed	No
Of	4 pails
Delivered on Euro pallets of	21 boxes x 4 = 84 pails

Using method :

- Adjust pH between 7,2 and 7,6 according to water hardness (using the pH correctors)

Dosage: from 100 to 150 grams per 10 m³ (to be measured with the dosing cup)

- Add the product in front of the outlets in *tiled pools* ;
- In *liner or polyester pools*, dilute the product in a pail before pouring it into the pool.

Warning : Leave the pump to run continuously for 4 hours.

Safety :

STOP ALGUES Double action shock oxidiser is corrosive and harmful if swallowed. Moreover, it is hazardous for the aquatic organisms.

- ◆ In case of contact with skin, wash immediately with plenty of water. Seek medical advice.
- ◆ If swallowed, seek medical advice immediately (show the label).
- ◆ Do not breathe fumes from the product while opening the packaging
- ◆ In order to avoid any accidental swallowing, do not eat, smoke or drink during use.
- ◆ Keep out of reach of children.
- ◆ Avoid contact with skin. Wash hands carefully after handling.
- ◆ **Do not mix with other chemicals (releases a toxic gas in case of contact with an acid).**
- ◆ Do not empty residuals into sewer.
- ◆ Rinse the empty packaging into the pool before disposal.

Storage :

Store in a dry and cool place.

Close container well after use.

Composition :

Powder made of a mixture of :

- Dihydrated Sodium Dichloroisocyanurate with a minimum of 56% of available chlorine (quick and complete dissolving organic chlorine without trace of residuals nor calcareous deposits),
- Potassium persulphate (active oxygen).

Shelf-life : 3 years
